As an accomplished software developer, I bring technical expertise alongside the discipline, determination, and leadership forged through military service. I have contributed to collaborative efforts delivering production-ready applications, consistently producing clean, maintainable code that drives business value. I operate with a mission-focused mindset—prioritizing precision, accountability, and continuous improvement in every project. Eager to tackle increasingly complex technical challenges, I seek environments where I can leverage my experience to architect innovative solutions while mentoring others and pushing the boundaries of my own capabilities.

TECHNICAL SKILLS

ASP.NET || Web API || C#/.NET || SQL || MySQL || HTML || CSS || JavaScript || Vue.js || ReactJS || Table Design || E/R diagrams || Unit Testing || Integration Testing || Unix || Linux || Ubuntu || Git || Visual Studio || Visual Studio Code || Cursor

TECHNICAL EXPERIENCE

Portfolio Website

Developed a personal portfolio website to showcase technical skills and professional projects. Built an interactive project display page featuring dynamic navigation buttons, custom CSS styling and formatting, and integrated data visualization diagrams. Implemented all interactive functionality and UI components using JavaScript to create an engaging, responsive user experience.

Coffee Website

Collaborated with a team to develop a coffee company website using React. Contributed to the design and implementation of the Hero Page, incorporating dynamic ReactJS elements to enhance user engagement. Engineered a parallax scrolling effect featuring a moving background image that responds to user scroll behavior, creating an immersive and visually compelling landing experience.

Pothole Tracker Application – Group Project

Created an application that allows users to report and upload images of potholes in the city of Columbus. Allows employees to add, delete, and update the status of potholes in real time for users to see. Used Vue.js on the front-end with Axios to access our backend ASP.NET API that updates potholes in the SQL database. Implemented various mapping and reverse-geocoding APIs to create an interactive user interface.

EDUCATION

ERA Solutions | Oklahoma City, OK

Summer Cohort

Attended a 9-week full-stack development course for veterans, covering HTML/CSS, backend development with MySQL, front-end development with JavaScript, and reactive web development using ReactJS. Successfully completed comprehensive testing for each module, earning certifications.

Tech Elevator | Columbus, OH

Summer Cohort, March 2022 – August 2022

Attended a 14-week full-stack coding boot camp learning how to create dynamic web-based software systems using C#/.NET programming language and platform providing 700+ hours of development education and application.

University of Maryland Global College | Adelphi, Maryland

June 2019 – July 2019

Credit towards bachelors in Computer Science

Columbus State Community College | Columbus, OH

August 2013 – November 2015

Credit towards bachelors in Computer Science

CERTIFICATIONS

- Certified HTML/CSS Web Designer – CoITB | Issued July 2025, Expires July 2028
- Certified MySQL Backend Developer – CoITB | Issued August 2025, Expires August 2028
- Certified JavaScript Professional Developer – CoITB | Issued September 2025, Expires September 2028
- Certified ReactJS Framework Developer – CoITB | Issued October 2025, Expires October 2028

PROFESSIONAL EXPERIENCE

Concentra | Addison, TX

Software Development Specialist I | October 2022 – November 2023

- Collaborated within an Agile team framework.
- Played a key role in a Secure File Transfer Protocol (SFTP) server migration project and ensured the maintenance of existing server connections to clients.
- Offered valuable assistance in managing Production Support Incidents using ServiceNow.
- Gained experience in PowerBuilder, contributing to both learning and development efforts.

United States Marine Corps | Camp Lejeune, NC

Combat Engineer and Combat Instructor | February 2018 – February 2022

- Mentored marines under management supervision improving both professional and tactical skills to assist the company in military operations both in the United States and overseas.
- Conducted company sized missions cooperating with over 100 marines with teams varying 4 to 8 marines executing specific time oriented tasks to further improve fighting tactics and fighting force.
- Instructed over 1,000 Marine Officer students in field operations aiding the teaching and graduation of United States Marine Commissioned Officers.
